## SECTION 4. FIRST AID MEASURES

### 4.1. Description of first aid measures

<b>Eye contact</b>	wash off with much water sufficiently turning over eyelashes until no chemical remains and wash (for 15 to 20 min.)
<b>Skin contact</b>	take off clothes and shoes polluted and wash off the regions contacted until no chemical remains with soap or soft detergent and much water. (for 15 to 20 min.)
<b>Inhalation</b>	Move the patient to a place with fresh air immediately and keep him or her warm and relax. In case of no breathing or irregular breathing, try artificial respiration
<b>Ingestion</b>	If the patient is conscious or doesn't have spasm, induce vomiting with emetic and water. If breathing is restrained or the patient doesn't vomit, pump his or her stomach carefully
<b>Protection of first-aiders</b>	If symptom lasts or there is any doubt, take medical actions or have specialists diagnose it as soon as possible. Never provide any drink or food to person without consciousness.

## 4.2 Most important symptoms and effects, both acute and delayed

<b>Potential acute health effects</b>	
<b>Eye contact</b>	Flush thoroughly with fresh water for at least 15 min. Get medical assistance immediately
<b>Inhalation</b>	: harmful in case of a long-term inhalation
<b>Skin contact</b>	likely to cause infection upon a long-term contact with skin
<b>Ingestion</b>	harmful in case of intake

## SECTION 5. FIRE-FIGHTING MEASURES

<b>Flash Point (°F/°C)</b>	<b>Flammable Limit (vol %)</b>	<b>Auto-ignition Temperature (vol%)</b>

### Method:

<b>Extinguishing Media</b>	Material is not combustible. Uses extinguish agents that are suitable to the surrounding fire. Carbon dioxide, dry chemical or alcohol resistant foam recommended. Apply water spray to cool exposed closed containers
<b>Fire Fighting Instructions</b>	
<b>Unusual Hazards</b>	
<b>Hazards from the substance or mixture</b>	Material is not combustible. Fire or excessive heat may produce hazardous decomposition of products, which may intensify the fire, Thermal decomposition may produce oxides of carbon and nitrogen: explosive vapor.
<b>Hazardous thermal decomposition products</b>	In case of fire may be released: carbon oxides.
<b>5.3 Advice for firefighters</b>	
<b>Special protective actions for fire-fighters</b>	NIOSH-approved Self-Contained Breathing Apparatus (SCBA) and full protective equipment recommended.
<b>Special protective equipment for fire-fighters</b>	Full protective clothing

## SECTION 6. ACCIDENTAL RELEASE MEASURES

<b>6.2 Environmental precautions</b>	
<b>For non-emergency personnel</b>	Immediately remove any clothing soiled by the product. In case of burns, immediately cool affected skin for as long as possible with cold water. Do not remove clothing adhering to skin. In case of unconsciousness place patient stably in side position for transportation.
<b>For emergency responders</b>	Substance is not combustible. In large surrounding fires all extinguishing media can be used
<b>6.3 Methods and material for containment and cleaning up</b>	
<b>Small spill</b>	Do not flush into surface water or sanitary sewer system. Inform respective authorities in case of seepage into water course or sewage system. Keep contaminated washing water and dispose of appropriately.
<b>Large spill</b>	Absorb or control the leak with incombustible materials such as sand and soil, etc. -> Clean with washing liquid. -> Put container outside the building and treat it according to the method of abandonment. (See Clause 13)

	-> Do not use water since it has strong dispersion force
